## 1.0 Summary: Natural Resources Appropriations Subcommittee

#### Overview

The Natural Resources Appropriations Subcommittee reviews the budgets for three state agencies, and then approves a budget for each. This recommendation is then made to the Executive Appropriations Committee and the whole Legislature for final approval. The agencies for which this subcommittee is responsible are:

- Department of Agriculture and Food
- Department of Natural Resources
- School and Institutional Trust Lands Administration

The Executive Appropriations Committee has allocated General Funds of \$45,358,200 to the Natural Resources Appropriations Subcommittee. This number was derived by taking the FY 2001 ongoing appropriation and adjusting for centralized services, as follows:

FY 2001 ongoing appropriation:	\$45,971,200
Retirement rate reductions	(633,800)
Internal service fund rate changes	20,800
Subtotal base:	\$45,358,200
Transfer of Veterans Cemetery to National Guard	(138,000)
Transfer of revenues from CIO for 800 MHz radios	34,500
Total base plus adjustments:	<b>\$45,254,700</b>

The Analyst's base recommendation reflects the retirement and internal service fund adjustments. Compensation package adjustments, including insurance benefits, are not included in the Analyst's recommendations. The Executive Appropriations Committee and the full Legislature will add these in later. The subcommittee may have additional non-compensation package items that it will want to fund. In that case, the subcommittee can reprogram funds within the base, or construct a prioritized list of issues in case funds become available later. The Analyst will present some recommendations for funding should funds become available.

In preparing for this legislative session, the Analyst has reviewed each budget, visited with the agencies, and analyzed the agency requests and the Governor's recommendations. After reviewing the requests, the Analyst has recommended those budget increases or decreases which seem essential to programs and appear to be the most cost-effective.

#### Recommendation

The Analyst recommends a total FY 2002 budget of \$157,866,300. This includes \$67,800 in budget changes. The total General Fund recommendation for FY 2002 is \$45,254,700. However, this report includes recommendations for additional funding, should funding be made available to the subcommittee.

The recommendations, by fund and by agency, are found on the following pages. Further detail on each agency is found under the respective tabs and will be discussed during the budget hearings.

# **Intent Language Review**

The Fiscal Analyst is required by statute to review all intent language written in the appropriations acts and report on them to the Legislature. A good deal of intent language was written that directs the Department of Finance to make appropriations nonlapsing. In order to avoid reviewing each piece of intent language that deals with nonlapsing authority, the Analyst reports now that in every instance the monies were used and accounted for in accordance with the intent language.

#### 4.4 Additional Information

The Office of the Legislative Fiscal Analyst is a non-partisan office that serves both houses of the Legislature in preparing a budget and determining the fiscal impact of proposed legislation and making independent budgetary recommendations to the Legislature. The Legislature, after reviewing the recommendations, then approves a budget by passing an Appropriation Act that determines the level of the budget for each program.

The state does not budget on the calendar year, but on what is termed a Fiscal Year, which is the twelve-month period from July 1 to June 30 of the following year. A Fiscal Year is usually abbreviated FY, with the number which follows designating the year which includes the second six months. The current fiscal year is FY 2000, which will end June 30, 2000. The fiscal year for which the Legislature is determining the budget is FY 2001, which will include the period of time from July 1, 2000 to June 30, 2001. Budgeting includes the allocation of resources (money) to different programs.

In allocating funds to the Natural Resources agencies, the Appropriations Subcommittee may use funding from several sources to complete the full appropriation to each. The following sources of funding are available:

- General Funds
- Federal Funds
- Dedicated Credits
- Restricted General Funds
- Land Grant Management Fund
- Other Funds

The following explanations may help to understand the different funds:

### State General Fund

This is the state's most important source of income. The primary revenue source is the sales tax, although there are other taxes and fees which are deposited into this fund. General Funds may be spent at the discretion of the Legislature, as the Constitution allows. Personal income taxes and corporate franchise taxes are not deposited into the General Fund, but into the Uniform School Fund.

## Federal Funds

Federal funds are those funds which come to the state from the federal government. Generally, federal funds are accompanied by certain requirements. Each grant may have different rules about how it may be spent. A common requirement is some form of state match in order to receive the federal dollars. In such cases, federal funding may be reduced

if a state program is reduced. There is also the possibility, that due to outside circumstances, federal funding may be reduced or eliminated. If this happens, most agencies will request that state funds replace the lost federal funds. However, this is not generally recommended. Programs that receive federal funds will have a special Federal Funds sheet showing matching requirements and levels.

## **Dedicated Credits**

Dedicated Credits are funds that are paid to an agency for specific services and are dedicated to paying for the expenses of providing that service. For example, money paid as admission to the state parks goes to the Division of Parks and Recreation to help pay for expenses. By law, these funds must be spent before other appropriated state funds are spent. It should be noted that an agency must estimate the level of its service for the following fiscal year, and thus its level of Dedicated Credits.

## Restricted General Funds

Restricted revenue can only be used for a designated purpose. The restricted funds usually receive money from specific sources, with the understanding that those funds will then be used for specific purposes. For example, the Utah Code establishes a separate fund for the Division of Wildlife Resources, with revenue coming from the sale of licenses. These funds are restricted for the use of the division.

## **Land Grant Management Fund**

An expendable trust fund consisting of:

- 1. Revenue derived from trust lands, except revenues from the sale of those lands.
- 2. Interest earned by the fund.
- 3. Revenues obtained from other activities of the Director or administration.

One of the purposes of this fund is to support the School and Institutional Trust Lands Administration.

### Other Funds

Several other small funds are used by certain agencies. These will be discussed in further detail as the budgets are presented. Lapsing funds, however, should be addressed. Funds lapse, or revert back to the state, if the full appropriation is not spent by the end of the fiscal year. Since it is against the law to spend more than the Legislature has appropriated, all programs will either spend all the money or have some left over. The funds left over lapse to the state, unless specifically exempted. Those exceptions include funds that are setup as non-lapsing. In these cases, left over funds do not lapse back to the state, but remain with the agency in a special nonlapsing balance, for use in the next fiscal year. In the budgets, the Beginning Non-Lapsing balance is the balance on July 1, while the

balance on the next June 30 is termed the Closing Non-Lapsing balance. The Closing Non-Lapsing balance from one fiscal year becomes the Beginning Non-Lapsing balance of the following fiscal year. The reasoning behind non-lapsing funds is that a specific task may take an indeterminate amount of time, or span more than one fiscal year. By allowing departments to keep their unexpended funds, the state not only eliminates the rush to spend money at the end of a fiscal year, but also encourages managers to save money.

Expenditure categories used by the state are:

## Personal Services

Includes employee compensation and benefits such as health insurance, retirement, and employer taxes.

## **Current Expenses**

Includes general expenses such as utilities, subscriptions, communications, postage, professional and technical services, maintenance, laundry, office supplies, small tools, etc. that cost less than \$5,000 or are consumed in less than one year.

## Data Processing Current Expenses

Includes items such as small computer hardware and software, port charges, programming, training, supplies, etc.

### Capital Outlays

Includes items that cost over \$5,000 and have a useful life greater than one year.

### Pass Through

Includes funds passed on to other non-state entities for use by those entities, such as grants to local governments.

Other Budgeting terms and concepts that the Legislature will encounter include the following:

#### Performance Measures

In recent years, performance based budgeting has received more attention as citizens and decision-makers demand evidence of improved results from the use of tax dollars.

Care must be exercised in crafting performance measures to avoid misdirected results. Moving to performance based budgeting is a long term commitment. The Analyst has drafted some ideas for performance measures in the write-up, however, it is recognized that the measures are a work in progress and that long-term tracking of measures would require a statewide commitment in both the executive and legislative branches.

## Intent Language

Intent language may be added to an appropriation bill to explain or put conditions on the use of the funds in the line item. Intent language may restrict usage, require reporting, or impose other conditions within the item of appropriation. However, intent language cannot contradict or change statutory language.

## Supplemental Appropriation

The current legislative session is determining appropriations for the following fiscal year. However, it may be determined that unexpected circumstances have arisen which require additional funding for the current year. The Appropriations Subcommittee can recommend to the Executive Appropriations Committee that a supplemental appropriation be made for the current fiscal year.

#### **FTE**

FTE is an abbreviation for Full Time Equivalent. This is a method of standardizing personnel counts. A full time equivalent is equal to one employee working 40 hours per week. Ten employees each working four hours per week would also count as 1 FTE.

#### Line Item

This is a term that applies to an appropriation bill. A line number in the appropriations bill identifies each appropriated sum. Generally, each line item appropriation goes to an agency that may have several programs. Once the appropriation becomes law, the money may be moved from program to program within the line item, but cannot be moved to another line item of appropriation.

A complete list, by line item, of the agencies for which the Natural Resources Subcommittee is responsible follows.
